INSPECTION ZONES

4800 km

ANNUAL YIELD VERIFIED

₹1,500 Cr

KFON PROJECT VALUE

MY ROLE

"I led the end-to-end vendor factory inspection for KFON — verifying every pipe meets specification before it enters Kerala's ground."

As part of the KFON QA team, I covered the full production chain — raw material intake through to the testing laboratory — producing the technical basis for vendor approval on this ₹1,500 Cr national infrastructure project.

WHAT I INSPECTED

- 01

Raw material verification

HDPE resin, colour masterbatches, PP rope stock and incoming test certificates reviewed against KFON spec
- 02

Live extrusion process

SMT extruder (350 kg/hr) during live production — cooling, rope insertion, haul-off and coiling verified
- 03

Finished goods warehouse

Pipe drums in all 7 KFON colours verified for markings, labelling, end caps and physical condition
- 04

UTM quality lab review

Reviewed live UTM data with Internal Coefficient of Friction Apparatus — impact tester and gauges confirmed

ME INSPECTING THE UTM TEST DATA

PROJECT DETAILS

Project	KFON Kerala
Client	Govt. of Kerala
My role	QA Inspection Engr.
Date	October 2019
Pipe spec	40mm OD · 33mm ID
Capacity	350 kg/hr · 4800km/yr
Outcome	Approved ✓

TECHNICAL SCOPE

- PLB HDPE Duct

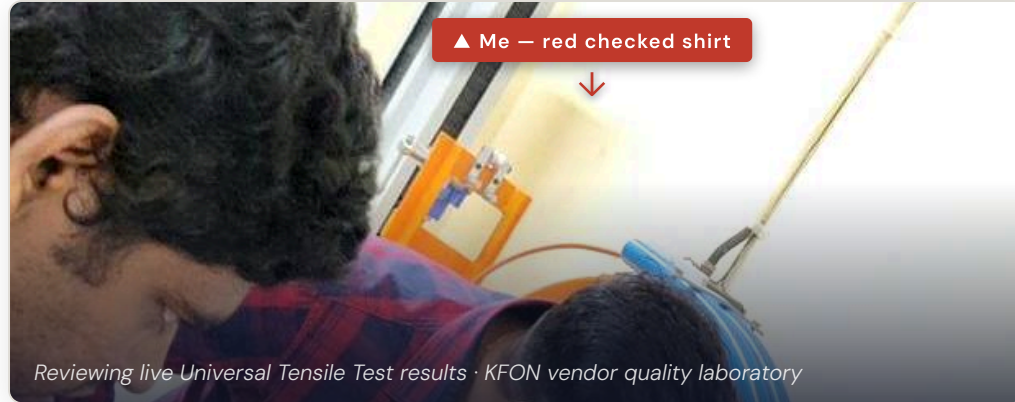

IS Spec Testing
- UTM / CoF

Impact Testing
- Extrusion QC

Vendor Approval
- Raw Material QC
- Dimensional Gauging
- Warehouse Audit

INSPECTION VERDICT

Vendor found adequately equipped and compliant. All major zones passed. Approved for KFON supply.
